Subject: RE: Scheduling a Call about the HAMP

The second week of December is good with me.

Subject: Scheduling a Call about the HAMP

There are a couple of topics that have come up that I am proposing that we talk about it as a group. The topics are:

- Proposed changes to the scope of work for some of the USEPA-funded construction activities associated with the HAMP. This stems from a voice mail that Bill Bettenberg had left me about some ideas for upcoming construction projects. I can also update you all about a recent activity at USEPA that may have some indirect implications to the project.
- How to address getting buy-in from the Traditional Leadership to the HAMP. The focus will be on FMCV, but perhaps the ideas we come up with could also apply to the other affected villages with a Traditional Leadership (e.g., Shungopavi, Mishongnovi [?]).

What is everyone's availability for a date and time during the first or second weeks of December 2014? My preference is the second week of December 2014, but I will go with the majority. Please let me know.

Thank you.
